

ACT Aspire[®] : Charting a Path to Success with the Summative Data Interpretation Workshop

The half-day Data Interpretation Workshop (DIW) is designed to help participants understand their summative reports and generate insights about their students and their educational practices. Participants will develop an action plan using their data to improve student readiness for college and career.

Who should attend

- Classroom Teachers
- School Leaders
- District Leaders

Why you should attend

- Deepen your understanding of how to interpret reports and compare student ACT Aspire performance to ACT Readiness Benchmarks
- Decide what actions need to be taken to improve student performance at the district, school, and classroom level
- Determine how to implement an action plan in response to your ACT Aspire data

What we will cover

- Navigating the ACT Aspire portal to locate reports
- Locating key data components from ACT Aspire reports
- Analyzing ACT Aspire report data for curricular, instructional, and intervention implications
- Developing an action plan in response to the data

Workshop is 3.5 hours

ACT Aspire® Insights and Planning

ACT Aspire

www.discoveractaspire.org

This booklet provides an overview of the summative reports and how to use them. Find out how to access the reports in the ACT Aspire portal and learn more about the ACT Readiness Benchmarks and ACT Readiness Levels so you can understand how to interpret your results.

This booklet provides multiple Analysis Guides organized by role (teachers, school leaders, and district leaders) and broken down by subject. Each Analysis Guide offers guided questions to help you read through your reports, make observations, begin action planning, and determine necessary next steps for specific groups in each educational setting.

“Now I get it! This training was so helpful for all of us in understanding how to interpret what the data is telling us about our school. Time well spent.”
